

Memorandum:

1 February 2014

TO: Vanda Grubišić
FROM: Al Cooper
SUBJECT: Paper submission

The accompanying manuscript, written with co-authors Scott Spuler, Mike Spowart, Don Lenschow, and Dick Friesen, has been submitted provisionally to Atmospheric Measurement Techniques. This is the discussion version, required for review. Jørgen Jensen and Jeff Stith provided thorough internal reviews of an earlier version of this manuscript, and their comments led to significant changes in the manuscript. Their reviews are attached, in Jørgen's case as annotations on an earlier version of the manuscript. Both support submission and publication of this manuscript.
